Monthly Newsletter | External Wall Systems

October 2022

Hello,

We hope this finds you and yours safe and well this Autumn! Thank you for taking the time to read our latest newsletter – please read on to find out the latest updates on the External Wall Systems project.

## *Building Safety Fund Application*

Following the request of The Building Safety Fund for confirmation of the building's height to ensure it is within the eligibility of the fund, we had the building measured using a laser. This has been submitted to the Fund and confirms that the building is over 18m in height.

We are still in discussions with the Fund on other points they have raised. They are currently requesting further information that would require an additional survey, but it is our view that the survey that has already been undertaken should satisfy them with the information they need.

Once we hear back from the Fund on this matter, we will let you know what the next steps are.

## *Project Update*

The project team continue to await the outcome of our technical eligibility. Once this has been provided to us, the team will be able to assess the next steps and begin to mobilise.

Thank you for taking the time to review our latest newsletter. As always, you can find copies of this and all previous newsletters [here](#).

You'll hear from us again next month, and if we have any big news to share before then, we will reach out. As always, our team are on-hand to answer any questions at [BuildingSafety@liv-group.co.uk](mailto:BuildingSafety@liv-group.co.uk)

Thank you,

Ryan Tones

Building Safety Officer
